

Note:

These recommended wheel alignment specs are just a base guide to start with, there are many factors that determine an effective wheel alignment including setup/experience/car usage i.e. street use, track use, track speed, terrain etc.

These specs are to be used as a starting point and then adjusted as required.

350Z-DKNK

WHEEL ALIGNMENT RECOMENDATIONS

Camber -4 degrees

Caster 4 degrees

Total Toe 0-2deg toe out
